Materials needed:

Water Solvable Stabilizer

Bobbin – use same color as thread.

Material for appliques

1. Hoop two pieces of water solvable stabilizer
2. Choose the material to be used in the applique. Designs may have more than one applique.
3. Stitch out design following color run information.
4. After each Outline stitch, place material so it covers the outline and secure with spray adhesive or tape. You may need to take hoop out of machine (not out of hoop) in order to secure applique material.
5. Place back into machine and stitch the Tackdown stitch. Take out of machine (not out of hoop) and trim the material close to the edge of the Tackdown stitches without cutting the stitches.
6. Place back into machine and finish stitching design. Repeat steps 4 and 5 for every applique area in the design.
7. After the last color, take out of hoop and apply water to dissolve the stabilizer. Lay flat to dry. You can use a book to make sure the bookmark stays flat during drying.
