

BuzzEdit

Version 3

Stitch Editor * Auto-Hoop * Layout * Customize * Wreath & Border Creator * Digitizer

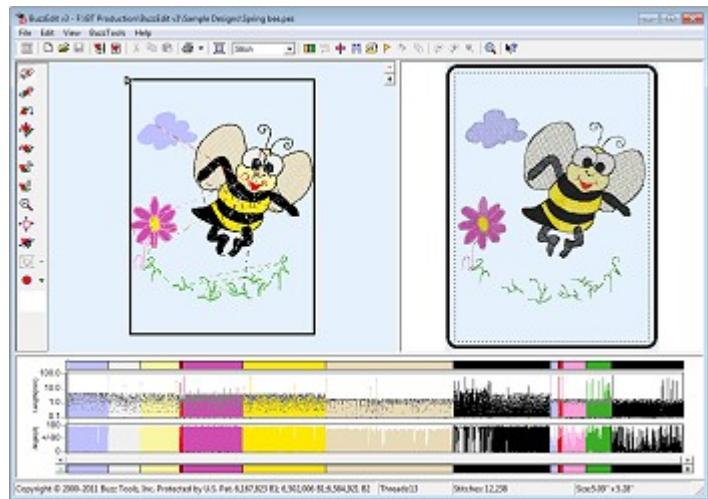

Power Over Your Embroidery Designs

You will be amazed at what you can do with BuzzEdit version 3. It is a powerful stitch editor, an auto-hooping program, a layout program, a basic digitizing program, a customizer and an automatic wreath and border creator. It's like having SIX programs in one!

Overview

While BuzzEdit started as a simple embroidery stitch editor, it has continued to grow into a robust tool for customizing and creating embroideries!

- Embroidery Stitch Editing - BuzzEdit provides powerful stitch editing capabilities. Add, delete or move stitches.
- **Enhanced!** Digitizing tools - objects are retained in the BUZ file for future editing -
- **New!** Appliqué function - create position tack down & finishing in one step
- **New!** Continuous Border Wizard - create continuous borders with ease & accurate alignment
- **New!** Wreath Wizard - quickly create coordinating wreath & label designs - colors are sorted for you automatically to save you time
- Automatically Split for Multi-Hoops
- **Updated** thread palettes and hoops
- **New!** Updated print functions - new print worksheet function creates a detailed printout to show you color breaks for better thread selections and more efficient time at the machine - updated template includes name of design, cross hair options, better graphics and more
- And more... Click on the features tab above for a feature list.
