## Easter Egg Holder Instructions

*Items you will need for this project:*

Fibrous water soluble stabilizer

Fabric for the front of the holder- this piece should be 1" longer and 1" wider than the finished size of the design

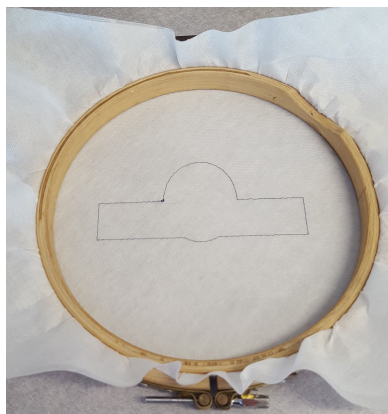

Fabric spray adhesive

Note: The outline and tackdown color changes are for the appliquéd area(s) of the design. The outline is a running stitch line that defines the appliqué's shape. Your piece of fabric should be a little bigger than the outline. The tackdown is a running stitch line that will stitch inside the outline to tack down the fabric. Trim the fabric close to the tackdown stitches

1. Hoop two pieces of fibrous water-soluble stabilizer.

2. Stitch the first color change; this is your outline for the fabric placement.

3. Remove the hoop from the machine. Using a very light spray of adhesive; place the fabric on the stabilizer, using the outline stitch as a guide.

4. Place the hoop back onto the machine and stitch the second color change; which is the tack down stitch.
5. Remove the hoop from the machine. Trim the fabric on the outside of the tack down stitches.

- Place the hoop back onto the machine, and stitch the remaining color changes.

Your Easter egg holder is now complete!

- Remove from the hoop.
- Trim the stabilizer close to the fabric.

- Use a small brush or Q-tip to apply water to dissolve the water soluble stabilizer.
- Add Velcro for closure.
