

ICTCS-1

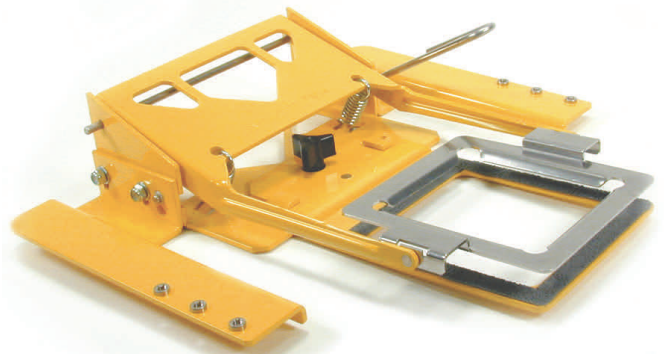

Tubular Arm Mounted Clamping System

The ICTCS-1 (Inter-Changeable Tubular Clamping System) mounts to your machine the same way that standard plastic hoops mount. So it's easy to install and remove quickly. The spring loaded clamp is actuated by a single lever, making clamping easy. Stainless steel adapter arms are available to fit all major machine configurations. If you use plastic hoops now, we have a clamp to fit your machine.

(3) Rectangular Window sizes come with a thin fabric and heavy duty top clamping frame.

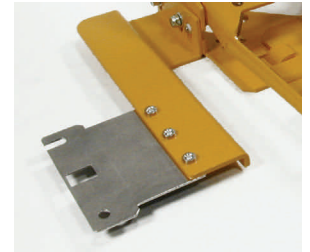

(3) Window "Cap Set" come with a thin fabric

- (6) interchangeable window sizes to choose from.
- Mounts to machine using tubular arms.
- Single lever opens, closes and locks the clamp.
- All metal construction, powder coated aluminum & stainless steel.
- Changing window sized requires no tools and takes only seconds.
- Adapter arms are available for all major single & multi- head machines.
- The clamp automatically adjusts to different fabric thickness.
- Clamping action does not leave "hoop burns"
- Clamp stays on the machine while loading and unloading.

Machine specific adapter arms are easily attached with 3 screws to the ICTCS Clamps. Each adapter arm set is designed to fit your machine type and sewing field size. (Brother adapter shown)

Both the ICTCS-1 & 2 can be converted to air actuated clamps by simply attaching the air cylinder assembly. This option allows the operator a "hands free" foot operated tool to use for high production or simply to save wear & tear on your hands.
