

adhesive-backed cardstock instructions

1

Open or create an image in the Silhouette Studio® software.

2

Place the adhesive-backed cardstock on a Silhouette cutting mat (if using a cutting mat that measures less than 12 inches wide, trim the cardstock to fit your mat).

3

Load the cutting mat and cardstock into the Silhouette. Select 'Adhesive-Backed Cardstock' in the media menu of the cut settings, adjust your blade, and proceed to cut out your design.

4

After your design is cut, remove the project from the Silhouette and carefully pick up the cardstock pieces.

5

Apply the pieces to your project.
